

THE BEST PAINTING REQUIRES THE BEST SUBSTRATE

Complete range of putties for smoothing
and repairing of walls & ceilings

DRIVEN BY INNOVATION

KRAFTPAINTS.COM

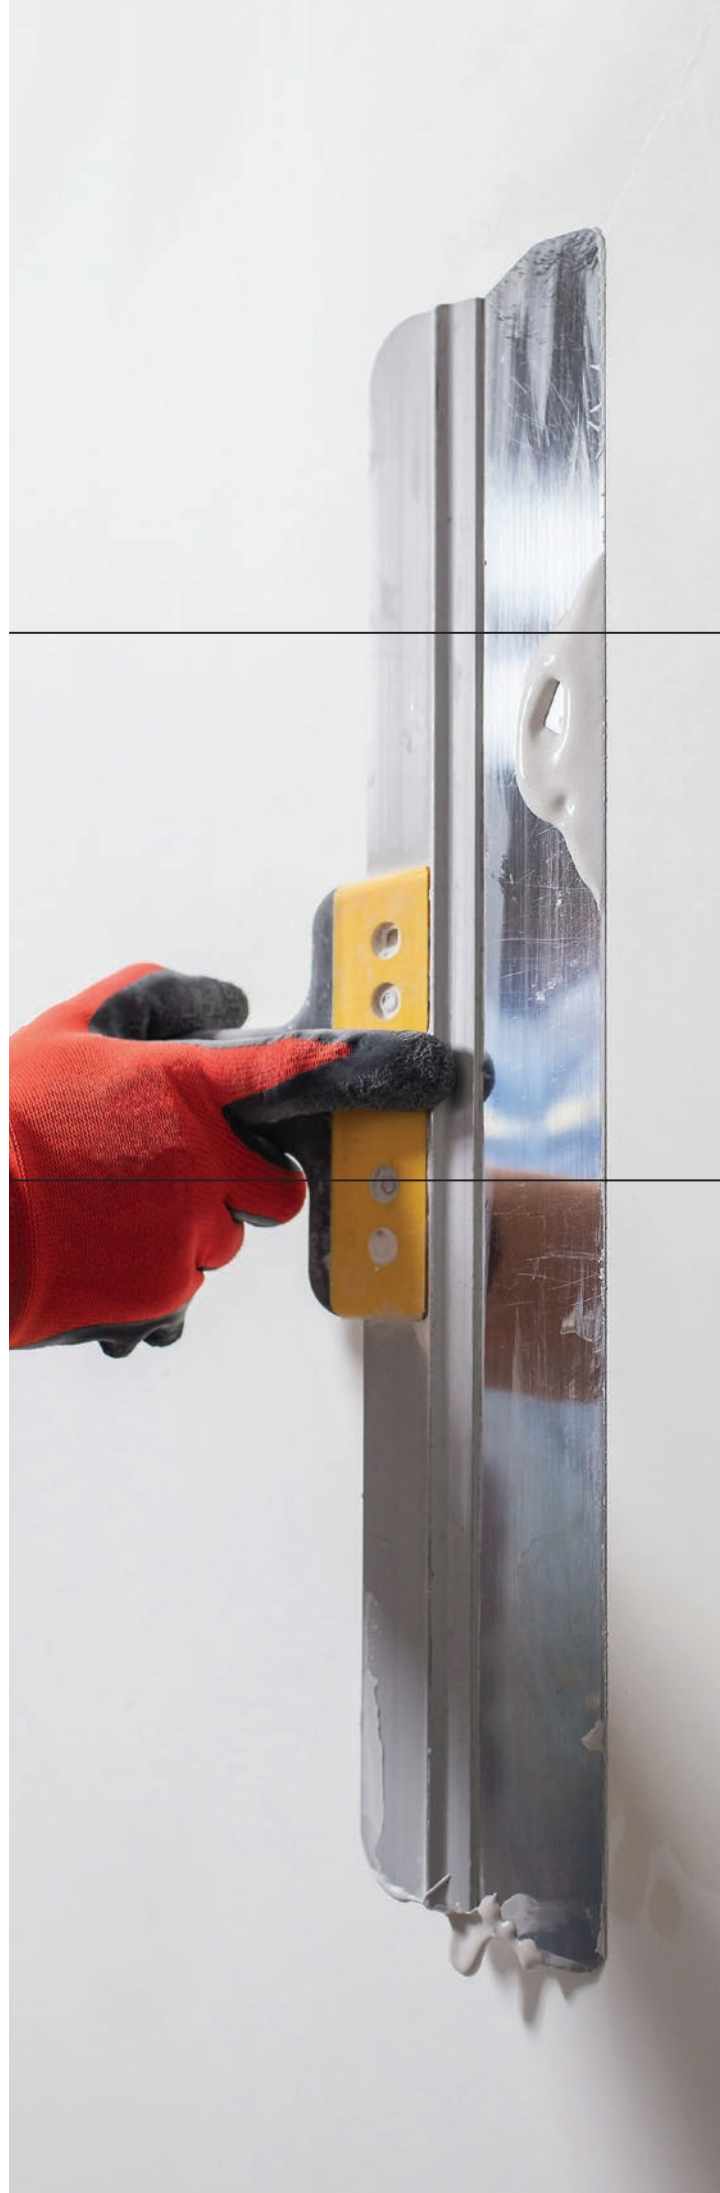

DRIVEN BY INNOVATION

KRAFT Paints is a leading force in the Market of architectural paints, varnishes, repairing mortars, thermal insulation & waterproofing solutions. By investing in new, high-end, automated production units in privately owned facilities, continues to stand next to building professionals, offering innovative products and complete technical solutions in construction.

KRAFT Paints proudly presents the complete product range of putties, crack-filling and repairing products - in powder or paste form - covering a wide field of applications.

Because no one knows better
the professional painters
than **KRAFT Paints**.

ALL IN ONE, REPAIRING, FILLING, SMOOTHING

Powderfine Multi

Multi-purpose (3in1),
fine-grained, white,
repairing putty
in powder form

Its advanced composition includes cement, modified resins, and active inorganic binders which give the product the **unique innovative combination of 3 capabilities: repairing - filling - smoothing.**

In addition, high protection against shrinkage cracking formation, excellent workability, great adhesion and sanding properties are ensured by the product.

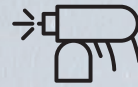

It is classified as a **GP CS-IV W_c1** mortar according to **EN 998-1** and as concrete repairing mortar **PCC R1** according to **EN 1504-3**.

- Application thickness: up to 20mm (locally up to 30mm)
- Unique innovative combination of repairing - filling - smoothing
- Can be sanded
- Fine-grained finish, equal to common troweling putties
- Thixotropic & non-shrinking
- Non-corrosive (free of chlorine ions and lime)
- Excellent adhesion to substrate
- Resistant to temperature changes
- Indoor & outdoor usage
- Packages: 25Kg & 5Kg

COMPLETE SOLUTIONS FOR PROFESSIONALS

Powderfine Exterior

Ultra fine-grained, white putty in powder form for indoor & outdoor usage

Its composition is based on suitably modified resins, improvers and special additives, providing the product with a high adhesion capacity, great resistance to weather conditions and ease of application. A smooth surface, with a velvety texture, without imperfections and cracks, is achieved after application.

It is classified as a **GP CS-IV W_c0** mortar according to **EN 998-1**.

- Application thickness: up to 2mm
- Enhanced formula for indoor & outdoor usage
- Great resistance to moisture & frost
- Great coverage
- Offers very smooth & durable surface
- Zero shrinkage & cracks
- Easy to sand & dry
- Packages: 25Kg & 5Kg

Powderfine Professional

Ultra fine-grained, white putty in powder form

Enhanced with modified resins and special additives. It is characterized by high adhesion capacity and ease of application, achieving a very smooth surface, with velvet texture, without imperfections and cracks.

It is classified as a **GP CS-III W_c0** mortar according to **EN 998-1**.

- Application thickness: up to 2mm
- Smooth surface with the first application
- Excellent workability
- Easy to sand and dry
- Cracking-free
- Does not dehydrate and does not shrink during application
- Packages: 25Kg & 5Kg

Powderfine Ready-Mix

Ready-to-use, ultra fine-grained, acrylic, water-based, white finishing putty

Ideal for smoothing interior large surfaces. It is suitable for masonry, plasterboard and plaster or concrete ceilings and is applied very easily, providing excellent coverage, filling capacity and a smooth even finish.

It is easily sanded without much dust. Re-usable material, repainted with emulsion paints or enamels.

According to **EN 13963**.

- Application thickness: up to 1mm
- Great coverage
- Offers super smooth & durable surface
- Fast application (ready-to-use product)
- Easy to sand & dry
- Packages: 18Kg & 5Kg

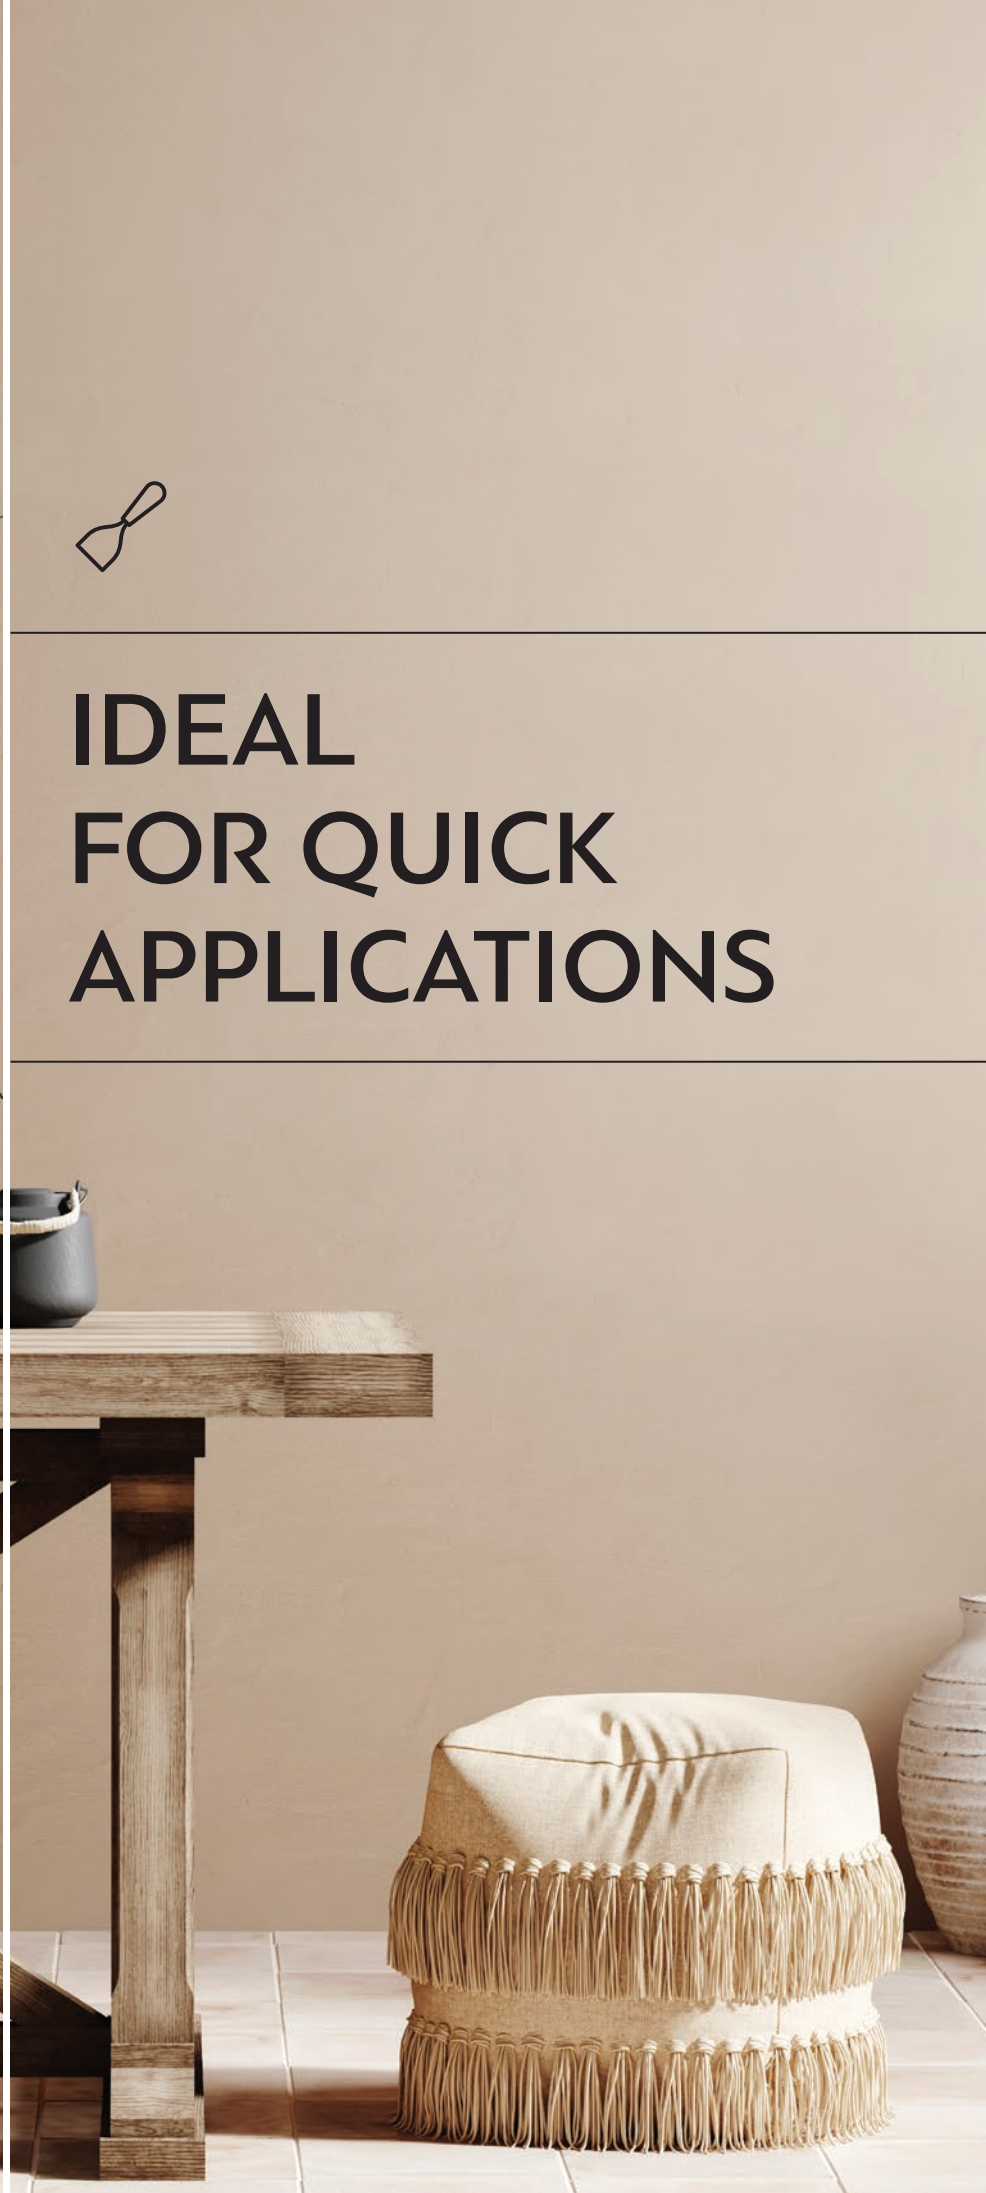

DRIVEN BY INNOVATION

IDEAL FOR QUICK APPLICATIONS

Putty

Elastomeric, acrylic,
ready-to-use,
water-based, white putty
with microspheres

Suitable for filling, patching cracks & holes where extra flexibility is required. Contains microspheres ensuring easily application, filling and minimal shrinkage.

It has excellent adhesion to different construction materials and excellent resistance to moisture, frost, alkalis & strong stresses.

- Excellent resistance to moisture & frost
- Excellent flexibility
- Ideal for persistent dynamic cracks
- Strong adhesion
- Indoor & outdoor usage
- Packages: 4Kg, 1Kg & 0,5Kg

Spachtel

100% acrylic,
ready-to-use,
water-based,
white putty

Suitable for filling, patching cracks & holes. It can be applied on woods, plasterboards, cement boards, plaster, primed metals etc. It is sanded easily and enhances the surface.

Superior to conventional putty or stucco which take long to dry and show frequently signs of yellowing, cracks and patches on the final coat.

- Great resistance to moisture & frost
- Exceptional filling & sanding properties
- Surface enhancement
- Great & smooth workability
- Fast application
- Packages: 5Kg, 0,8Kg & 0,4Kg

Spachtel Light

Lightweight,
ready-to-use,
white putty for fast
& easy filling

Suitable for filling, patching cracks & holes (up to 5cm) very fast & easy. It contains acrylic copolymer resins and glass beads. Can be applied on surfaces such as plaster, brick, plasterboard, wood, concrete, etc.

Offers great workability, dries very fast and does not shrink. Can be painted quickly without cracks or detachments.

- Easy application
- Non-shrinking
- Fast-drying (only 30 min)
- Suitable for indoor & outdoor usage
- Package: 600ml

THE RIGHT PRODUCTS FOR THE RIGHT SUBSTRATE

Complete range of putties for smoothing
and repairing of walls & ceilings.
